Do You QuantumThink? New Thinking That Will Rock Your World shows us how to walk the talk.

Author Dianne Collins says, "What I am passionate about is having all of us make the literal leap from *knowing* the wisdom to actually *living it* - as the walking-talking embodiments of expanded consciousness and awakened thinking and awareness, applied practically in daily life. That is the purpose of QuantumThink™ — to make it easy and enjoyable and engaging for people to make that leap.

My intent in writing the book, *Do You QuantumThink? New Thinking That Will Rock Your World* was to write in an entertaining and engaging, personal from-me-to-you style so you enjoy reading it - while at the same time, you are awakening your own awareness and expanding your thinking, as you read. Part I Wake Up discusses the Situation humanity finds ourselves in today, and delves into the questions, what do we really want? and what is our means to creating it? Part II Live the Wisdom presents the QuantumThink™ principles I call 'distinctions.' So I am not saying, hey we really should think in a new way, people -- I am saying, let's take a good look ... here is why we need to think in a new way -- and guess what, here is how we can. Here is the system."

Dianne Collins is an original thinker, media personality, and one of the foremost thought-leaders of our time. She is a master of translating ancient knowledge into "quantum" modern wisdom that provides a transformative platform for the way we conduct our business and personal affairs. Dianne is the creator and author of QuantumThink™, a new system of thinking that has us leap from the outdated "old world view" limits of the Industrial Age to begin thinking from the more accurate and up-to-date "new world view" of our current Quantum Age. Along with her husband and business partner, she consults visionary leaders and executives in the world's leading corporations including Accenture, AT&T, CNN and Dupont as well as presenting QuantumThink™ to entrepreneurs and students, homemakers and professionals, celebrities and evolutionaries worldwide.

Do You Quantum Think?

Review by Maryann Miller

In *Do You Quantum Think*, Dianne Collins explains why creating the reality we desire isn't as simple as just visualizing it. The collective world view from centuries past right up to the present, including news casts, books and movies, influences and helps program your thinking much more than you ever thought possible. All of these influence, particular the

world view you hold within your subconscious, determines the laws of reality you follow, which in turn creates the reality in which you live.

But Dianne points out that you are not stuck with a centuries old mechanical world view. You can easily transition into an *infinite possibility world view* with Quantum Thinking. Quantum Thinking allows you to tune into holistic and holographic systems that let you “transcend your limited experience of time and go from overwhelmed to relaxed alertness.”

Dianne says, “In QuantumThink™ our main concern is how we can use the latest discoveries to shape our thinking and elevate our results and mastery in life.” Quantum physics has proven there is no separation, everything is connected. You make distinctions within wholeness and depending upon your view or opinion of the distinctions you make, you create your world view and the reality in which you live.

Dianne says *intent*, not positive thinking is very important. “Positive thinking is something like trying to cover over a thought you believe is ‘the way it is’ with another thought that amounts to wishful thinking. **Intent is consciously created, with awareness in the present moment. What’s possible when you know you are living in an Observer created Reality is: if you are not getting a result you want, you can create a new Intent, and you will alter the result.” In other words, “reality is not absolute; reality is alive and being created all the time by virtue of the way we relate to it, by what we bring to it.”**

Movements upward in consciousness are usually initiated and led by a relatively small number of people who understand how the underlying principles of our world-created reality work and how to use those principles in dynamic ways to change our individual realities.

With *Do You Quantum Think?* Dianne Collins has provided a vehicle for individual and collective changes in our current world views. She covers, in great detail, the steps that are needed to creatively think outside the box and craft the reality we individually desire.

Do You Quantum Think? is not restricted to just a scientific or philosophical view. It incorporates the positive aspects of many approaches that combine in an easily understandable read. Most importantly, it provides a direction to apply what we have learned from her book to our everyday lives. This affects not only us but those who share our reality, whether they be family, friends, business associates or even adversaries.

Dianne has managed to bring challenging concepts into easily understandable language and illustrates ways of applying a new world view to overcome obstacles and create the world in which we wish to live. This is a must read for everyone wanting to create a better life for themselves.

“The world is changing at a dizzying pace. We're all looking for new ways of thinking that can bring about real solutions to modern problems, from the pursuit of inner serenity to solving world conflicts. In *Do You Quantum Think?* Author Dianne Collins shares her ingenious discovery that reveals a critical missing link to make sense of our changing times. Her discovery provides us with the understanding and methodology to rise above problems of today by laying the foundation for an entirely new way to think.

Part science, part philosophy, part spirituality, *Do You Quantum Think?* draws on a wide spectrum of sources, from cutting edge innovations in the sciences to the insights of the world's greatest spiritual leaders. This book will make you laugh, free you from limiting ideas, and introduce you to the most advanced principles and practical methods for living. *Do You Quantum Think?* will rock your world in the best of ways as you experience one revelation after another.

Dianne Collins in her own words...

"I grew up in a small town on the New Jersey shore very near the big city of New York, so I got to experience a wide diversity of cultures from rural and suburban to the sophisticated Big Apple. I later moved to south Florida to study Philosophy at the University of Miami. I advanced through several years working in corporate management and later transitioned to the arts, becoming an award-winning photographic artist. All my life I wondered how we could have the world function in the harmonious, noble picture that all people seemed to aspire to yet was blatantly missing in politics, in corporate cultures, in the media, and within our own families. "It occurred to me even as a teenager that it would take a literal quantum leap in consciousness, an awakening of the way we think and view the world and each other. This quest led me to create QuantumThink® -- a new system of thinking, 21 distinct principles based in discoveries at the edge of science merged with universal ageless knowledge, and lived as modern, practical wisdom.

"The idea is that we can put it all together -- see the big picture of how our habits of mind affect our outcomes and experience of life in real ways -- and that we can easily and joyfully condition our thinking to be in sync with the way things actually work according to nature. The result is you not only learn 'everything you ever wanted to know about science and spirituality and didn't know to ask' :) -- you will likely experience a new command and confidence in your own mastery in living, you'll view what's going in the world now in an optimistic and transformative light, and you will feel really good about all that. This is what readers tell me. I would love to read your own "reader review" on the site after you read the book, too. And may quantum leaps abound!"
